

## About Brass Dome Ventures Ltd.

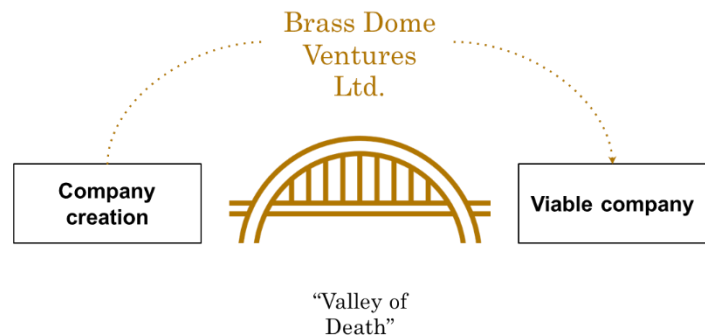

Brass Dome Ventures Ltd. is a management and business consultancy. We specialize in collaborating with innovative and visionary companies in the planning and execution of their goals and objectives. Within our team and through our extensive network of international experts, we have experience in industries as diverse, but not limited to, biotechnology, medical devices, energy, and technology. We have successfully grown our own businesses and have the knowledge and skills to help advance yours to its next stage of evolution. Our clients come to us with their visions. We translate these visions into successful commercial enterprises.

Since the early 1980s, our team of business leaders have successfully founded and/or managed several companies, growing them organically and through M&A strategies. One such venture resulted in the largest pharmaceutical licensing transaction in Canada.

### **Business Objectives:**

The team at Brass Dome Ventures Ltd. brings a wealth of business experience to assist companies on their paths to success, supporting them in overcoming the “valley of death”. By so doing, we are empowering visionary leaders to realize their dreams and achieve their visions.

**We are able to successfully counsel, mentor, and advise entrepreneurs because we are entrepreneurs who have successfully “been there and done it”.**
