

David Hood Biography

Dave Hood served as the Senior Advisor to the Principal Assistant for Acquisitions at the US Army Medical Research and Material Command from 2004 through 2009. Formerly, he was the co-founder and President of Integrated Medical Systems where he was also the co-inventor of the company's core product line. Prior to being selected to guide this successful spin-out from Northrop Grumman, he served as a Senior Program Manager successfully guiding the development and deployment of various integrated sensor systems for high performance aircraft, missiles, and satellites including the stealth bomber and the Global Positioning Satellites (GPS).
