Company Bio:

Innovate Calgary is the technology transfer office and business incubator center for the University of Calgary. As part of the Office of the Vice-President (Research) portfolio, we work with researchers, students, and the community to help bridge the gap between discovery and creating economic and societal impact.

Mission:

Our vision is to be recognized as one of Canada's top five research universities, and this commitment is at the centre of our work, locally, nationally, and globally. This includes being a leader in serving diverse entrepreneurs and promoting inclusive innovation.

We thank all applicants, however, only candidates selected for an interview will be contacted. The application will remain open until a successful candidate has been found.

Job Title: Innovation Analyst

Job Description:

In support of the New Ventures Group at Innovate Calgary, this role will assist in development of materials and resources to enhance program and service delivery and to measure and sustain scalable impact for participants and alumni of our core Life Sciences programs, including [Life Sciences Fellowship](#), [Medventions](#), etc. The applicant will also support efforts to design and improve data driven approaches to evaluate future innovation program opportunities for students and researchers.

The applicant would work with the program development team at Innovate Calgary as well as directly with emerging life sciences startups; as such, the role offers an incredible opportunity for to support the business development a diverse group of promising new life sciences ventures using data driven approaches.

In particular, key tasks will include:

- Systems design/improvement/implementation for program impact measurement and tracking
- Systems design/improvement/implementation for Startup assessment and tracking
- Opportunity scanning for recruiting companies and individuals to core programs
- Program data analysis and reporting
- Relationship building and management with researchers and clinicians
- Program EDI strategy design/improvement/implementation
- Ongoing evaluation of existing professional development programming opportunities and design and execution of new ones
- Other duties and responsibilities as assigned.

This position supports Life Sciences focused programming and therefore requires the applicant to have a background in some combination of: Engineering (biomedical), Medicine, Nursing, Science, etc.

Funding requirements for the position require the applicant to be **enrolled** in an under-graduate, graduate or post-graduate degree program.

Skills & Qualifications:

- Previous industry/business development experience required; experience with a startup an asset
- Data science background/experience required; experience with qualitative data sets an asset
- Experience building processes and workflows required
- Experience with Salesforce or similar CRM required
- Strong attention to detail
- Demonstrated ability to manage competing projects/priorities from multiple stakeholders
- Commitment to accountability
- Independent self-starter with demonstrated ability to learn new skills quickly
- Reasonably comfortable with uncertainty and demonstrated ability to complete tasks with incomplete information
